Greening
the Desert
with Rootzone
technology

Bioengineers: Design · Supervision · Construction · Operation

GREENING THE DESERT WITH ROOTZONE TECHNOLOGY

- Treatment of produced water, oil sludge and mud
- Rootzone is natural cleaning of oil and waste water
- EU-Verification for oil treatment
- Meet the Government demands
- No energy consumption and emission of carbon dioxide
- Greening with vegetation
- Cooling the desert to under 30°C
- Recirculation/irrigation for local crop production like dates
- Raise your environmental profile
