## Urban Development Integrated with Nature

Bioengineers: Design · Supervision · Construction · Operation

## INTEGRATE NATURAL PROCESSING IN HOUSING AND INDUSTRIES

- Natural ventilation with cooling / heating – with Geoventilation and solar chimney
- Renewable energy production – with sun, wind and biomass
- Indoor climate – with BioVentic
- Water treatment and recirculation – with Rootzone
- Waste handling and transfer for reuse – production of Bio-Fertilizer
- Building Materials – control of Chemicals
- Free space – Greening for solar protection and cooling
